

BUSINESS SUITE

SAFEGUARDS COMPANIES FROM POTENTIAL CYBER THREATS & DATA BREACHES

BUSINESSES BEWARE

- **70%** of SMBs report that their employees' **passwords have been lost or stolen** in the past year¹
- **45%** of SMBs **have no understanding** of how to protect against cyberattacks¹
- **8%** of organizations that pay ransom **get all their data back**²
- **69%** of **cyberattacks** target SMBs¹

BUSINESS SUITE

Let's get serious about cyber threats and identity crimes impacting businesses everywhere — and the increasing focus on hackers targeting mobile devices. With nearly **68 percent** of business leaders feeling that their cybersecurity risks are increasing, Sontiq's Business Suite is built to help organizations protect what matters most — from the foundation of their livelihood to the employees who execute upon their vision and strategy.

Our Business Suite provides essential identity theft protection and mobile cybersecurity services, enabling companies to focus more time and attention on building capital, expanding their customer base, and creating customers for life.

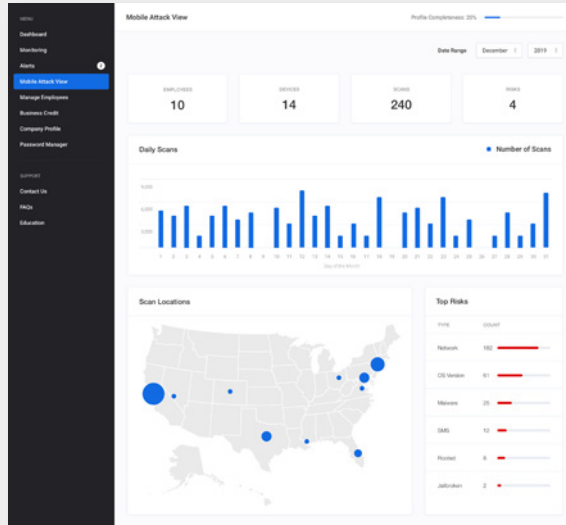

And, with our bundled solution options, we've created an industry-first suite that empowers businesses to guard against fraud and cyberattacks — for both their business and their employees. Organizations benefit from:

- 1 BUSINESS CREDIT MONITORING, SCORE, & REPORT** | Business Credit Score, Business Credit Report, and Business Credit Monitoring is provided so that you can confidently manage your business credit.
- 2 BUSINESS DARK WEB MONITORING** | A must-have for businesses of any size, providing alerts if your Personally Identifiable Information (PII) or confidential business data is on the Dark Web — the unindexed, and often illegal, area of the Internet where sensitive data is bought and sold. For example, Employer Identification Number (EIN), domain, Creditsafe Safe Number, D-U-N-S Number, and corporate credit card numbers are continuously monitored. Letting this information fall into the wrong hands can be catastrophic in terms of critical data loss, disruption to operations, financial losses stemming from restoring systems and files, and, of course, damage to the company's reputation.
- 3 FULLY-MANAGED BUSINESS RESTORATION** | Exclusive service includes proactive capabilities and a white-glove response program, featuring access to dedicated and certified resolution experts to keep your business and financial profile healthy.

INNOVATIVE MOBILE CYBERSECURITY CAPABILITIES

There's a misconception that mobile devices are safer than other physical devices, such as laptops and PCs. In fact, mobile devices are a growing gateway for fraudsters — **69 percent** of cyberattacks target SMBs. Sontiq equips your business with access to its **Mobile Defense Suite**:

- MOBILE ATTACK CONTROL |** Through an award-winning mobile app powered by Sontiq, your employees gain comprehensive device scanning, alerting them if their device has been compromised. Mobile Attack Control looks for a wide array of threats, including rogue apps, spyware, unsecured Wi-Fi connections, and even recognizes fake or "spoof" networks.
- MOBILE ATTACK VIEW |** Delivers a single-source view for your internal team, showing any mobile threats from devices that are connected to your system. This ability to recognize vulnerabilities in real-time gives technology leaders the advantage of stepping in to take action before a data breach occurs.

As part of Sontiq's Business Suite, employees are also protected with best-in-class identity theft protection, mobile cybersecurity capabilities, and world-class resolution services.
