

# HOW IT WORKS FOR KYLE

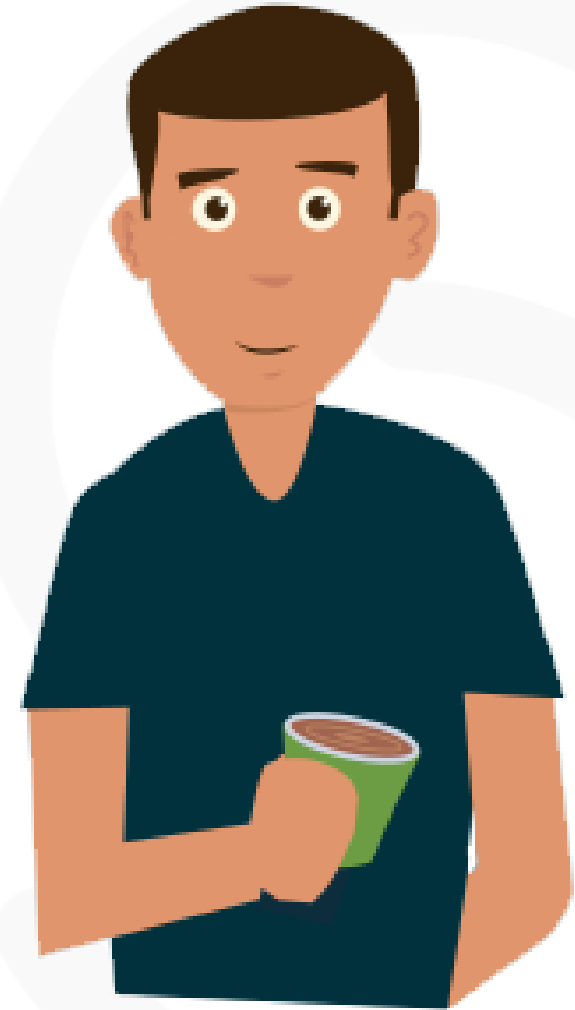

*Personalized Breach Risk Intelligence*

# A CONNECTED LIFESTYLE

## Meet Kyle

Kyle visits his doctor regularly for routine monitoring of a chronic health condition. He frequently logs into his online health portal to review his lab work results and medical records. He is enrolled in identity theft protection services from Sontiq and its brands, EZShield and IdentityForce.

# MEDICAL ID ALERT RECEIVED

**Kyle's phone pings with a notification — his medical records have been compromised in a data breach**

Kyle receives a notification from Sontiq that his personal information was located on the dark web. The alert indicates his medical history, healthcare provider account number, and health insurance account number were compromised in the Advocate Aurora Health breach.

# CONSOLIDATED BREACH RISK SCORE

## Kyle reviews the risk score

Kyle sees that Sontiq has rated the Aurora Health breach as a 6 out of 10, meaning it poses high risk to his personal identity. He checks his consolidated breach risk score to see that it has increased from 7 to 8 out of 10. He observes that this is the third breach confirmed to have compromised his medical information

# CUSTOMIZED ACTION PLAN

## Kyle's customized action plan guides him through what to do next

Kyle is guided through risk mitigation steps personalized to his data breach record. Sontiq indicates his credit monitoring and dark web monitoring are already covered and reminds Kyle to check his medical records regularly for unexpected benefit claims.
